WhatsApp: +234 905 086 1184, **Tel:** +234 705 726 1677

Career Objectives / Professional Summary

Highly motivated and detail-oriented Web Developer and IT Specialist with a strong academic foundation in Software Engineering and hands-on industry experience across IT operations, platform development, and digital content creation. I developed strong professional expertise at **Orbit 360 Resources**, where I worked as an IT Specialist managing system configurations, networking, hardware maintenance, and technical support to enhance organizational efficiency.

Beyond my core IT responsibilities, I have successfully taken on diverse roles, including content creation for **Skillhat Consulting Firm** and technical support for **Adorable Toes School**, demonstrating adaptability, creativity, and strong problem-solving skills.

Since 2021, I have played a key role at **Sales366 Online Limited**, where I built and continue to maintain www.sales366.com.

In recognition of my commitment, innovation, and technical expertise, I was awarded 1.5% company equity. The platform later expanded into Canada with www.sales366.ca, which I am part of in the development.

In addition, I recently developed www.ankoorsaf.ca, the website for **Ankoorsaf solution Inc.** A Canada-registered company specializing in shipping and logistics services between Nigeria and Canada. I am also currently building the production tools for their shipping operations as a dedicated subdomain, further demonstrating my ability to deliver scalable, business-critical platforms from the ground up.

Recently, I was approached by **Pivotal Workforce** in Canada, and I began supporting their technical operations through several key projects, including website migration, CRM configuration, Open CATS setup, and deployment of RDP-based virtual machine environments. This work further highlights my ability to manage infrastructure and deliver reliable business platforms.

Beyond technical expertise, I bring an entrepreneurial spirit and selfless commitment, having worked with several organizations in a capacity that prioritized growth, innovation, and long-term value creation over immediate earnings. This unique perspective has allowed me to develop strong problem-solving skills, resilience, and the ability to see opportunities where others see challenges.

Experience
